Andrew Rybaltouski

About

I'm a front-end developer who likes building complex and beautiful user interfaces with React and "friends" (MobX, React Router, Next, etc), set up Webpack configs, coding responsive HTML templates using CSS-grid and CSS custom properties, and improve websites performance. Also, I'm a big fan of TypeScript and TailwindCSS

Hard Skills

- CSS (SCSS, PostCSS)
- HTML (Pug/Jade)
- JavaScript (ESNext/Babel)
- TypeScript
- React (Next)
- State managers (MobX/Redux)
- Webpack (Rollup/Parcel/Vite/Snowpack)
- Linters (ESLint/Stylelint)
- Formatters (Prettier)
- REST/GraphQL
- Storybook
- Unit/E2E tests (Jest/Playwright/Puppeteer)

Soft Skills

- Problem solving
- Creativity
- Presentation skills
- Perfectionism
- Communication

Jan 2020 – Present

IDT Corporation

React TypeScript MobX React Router TailwindCSS Webpack Rest GraphQl Firebase Netlify Figma/Zeplin GitHub

Worked (as a core team member) on developing from scratch, launching and supporting new React single page application for international money transfer, mobile top-up, and calling recharge https://account.bossrevolution.com

Deeply involved in code reviews, spike investigations, bug fixing, daily scrum meetings, and helping up and running project for new team members

Mar 2019 – Jan 2020

Freelancer

PostCSS Pug JavaScript (ESNext/Babel) Webpack React Drupal WordPress Figma/Adobe XD GitHub

Worked on several clients' multi-page projects and applications (powered by WordPress/Drupal) in different domains as a freelance developer.

Worked on converting static Figma mockups into server-side PHP templates, creating React widgets, daily verbal and written communication with clients, deploying finished project on a client's server

Mar 2018 – Mar 2019

Officeton IT

Jade SCSS JavaScript (Babel) jQuery Gulp GitLab Photoshop

Participated (as a core team member) in developing, launching, and supporting new multi-page B2B portal officeton.by

Worked on converting complex static mockups into responsive HTML templates, writing JS code for bringing interactivity to pages, optimizing project performance, daily bug fixing, interacting with a Back-end developers.

Feb 2017 – Feb 2018

Freelancer

HTML SCSS JavaScript Gulp Drupal Wordpress Photoshop GitHub

Worked on several clients' multi-page projects and applications (powered by WordPress/Drupal) in different domains as a freelance developer.

Involved in converting static mockups into server-side PHP templates, daily verbal and written communication with clients, deploying finished project on a client's server
